

Get In-Depth Monitoring of NonStop Systems.

At Some of The Industry's Most Intelligent, No-Sweat Prices.

ALTERNATIVE THINKING ABOUT SYSTEMS MONITORING:

Alternative thinking isn't just about constantly monitoring your applications and systems.

It's about alerting you to issues and even fixing them – automatically – based on your specific business goals.

HP's NonStop Availability, Stats and Performances product (known worldwide as HP ASAP) provides automatic monitoring of your system and application objects, keeping you aware of the status of your processing environment at all times.

With HP ASAP, you can set goals that alert you if problems occur. You can also link goals to corrective actions such as initiating repairs or restarting failed components – automatically.

While many monitoring solutions track a few dozen system attributes, HP ASAP lets you monitor thousands simultaneously. What's more, ASAP consumes very few CPU cycles.

Now, you'll know instantly when CPUs are too busy, when disks switch paths, when applications are not performing well, or when there are a myriad of other problems that NonStop ASAP can isolate and resolve.

HP ASAP. For 10 years, the smart, affordable way to keep NonStop servers running non-stop.

Technology for better business outcomes.

HP NONSTOP ASAP

- Monitor applications, system & network resources
